

# **18kw photovoltaic inverter**

## Overview

---

What is a 18kpv inverter?

The 18kPV is a 48V split-phase hybrid inverter that's capable of running off-grid, in grid-assist hybrid mode, or even as a grid-connected unit that allows you to sell power back to the grid for net metering purposes. Here's a quick look at its specifications and features according to EG4:.

What is the EG4 18kpv-12lv solar hybrid inverter?

The EG4 18KPV-12LV Solar Hybrid Inverter offers 18kW PV input, 12kW output, remote monitoring, and seamless grid-tie/off-grid functionality.

What is a 18kpv Solar System?

The 18kW solar input that gives the 18kPV its name is a major advantage. With its 12kW output, you can power your loads at full capacity while still charging your batteries with the remaining 6kW of solar coming into the unit. This setup ensures you're maximizing your solar production, even when running your system at "full tilt."

What is a flexboss 18kpv solar inverter?

**Solar Input:** As the name implies, it has a hugely impressive 18kW solar input, which was only recently bested by the FLEXBOSS 21's 21kW PV input. The 18kPV's three MPPT charge controllers also allow it to function as a split-phase inverter, meaning it supports 120V and 240V configurations.

How many units can a solar inverter run?

With 18kW PV input and 12kW output, the inverter offers high energy handling and can parallel up to 10 units for expanded capacity. A 600V DC input and three MPPTs ensure optimal energy conversion and streamlined cable management.

How much power does the EG4 18kpv provide?

With the capability to harness solar power, battery storage, and grid electricity simultaneously, it delivers up to 12,000W of uninterrupted, continuous output. In the event of a power outage, the EG4 18kPV serves as a reliable backup power source, even without solar input.
