

# 500 kWh energy storage lithium battery

## Overview

---

What is a 50kw-300kw lithium energy storage system?

A 50KW-300KW lithium energy storage system consists of 48-volt modules with capacities ranging from 100Ah to 400Ah. These systems can be paralleled up to 14 units if a larger battery storage system is required.

What voltages are available for a battery energy storage system?

All system systems are offered with either 400VAC or 480VAC 3 phase interconnect voltages. Each commercial and industrial battery energy storage system includes Lithium Iron Phosphate (LiFePO4) battery packs connected in high voltage DC configurations.

How can a lithium-ion energy storage system help your business?

Commercial and industrial companies often have high peak loads in their energy consumption. An energy storage system can help shave those peaks. Optimize energy consumption by storing surplus self-generated power for use when needed. We are your partner for the development and delivery of customised lithium-ion energy storage solutions.

What is a Megatrons 500KW battery energy storage solution?

MEGATRONS 500kW Battery Energy Storage Solution is the ideal fit for commercial applications. Utilizing Tier 1 LFP battery cells, each commercial BESS is designed for a install friendly plug-and-play commissioning. Each system is constructed in a environmentally controlled container including fire suppression.

How much does a 500Wh Levo/Kenevo battery weigh?

The 500Wh battery for Levo/Kenevo weighs 6 lb 14 oz.

Why should you choose a lithium-ion large-scale storage intilion | scalecube?

This also includes the development of advanced business models for industrial applications in the context of energy storage. The Lithium-ion large-scale storage INTILION | scalecube offers you a reliable energy supply. It can be individually adapted to your project.
