

530 Photovoltaic Panel Price

Overview

How long does a 530 W solar panel last?

After the 30 years are over, your modules will still show at least 89.3% of nominal capacity. A substantial 25-year product warranty is also included with this 530 W Silfab solar panel. This module is weatherproof due to the 1.4" frame manufactured from anodized aluminum alloy and a layer of safety tempered glass.

What makes silfab 530-xm a good solar panel?

To further boost the performance, Silfab employs half-cut cell technology. Each of the panel's 132 cells is only half the size of a traditional solar cell. This grants SIL-530-XM lower resistive losses and better shade tolerance. The efficiency of this model reaches 22.3% — well above the market's average.

What is a SIL 530 XM solar panel?

SIL-530-XM is part of the NTC Series — one of the most recent made by Silfab. These panels employ cutting-edge technologies to achieve superior efficiency and reliability. The Passivated Emitter Rear Contact (PERC) technology ensures excellent power output. This solar cell type employs an additional reflective layer to absorb more sunlight.

How much power does sil-530-xm produce?

SIL-530-XM produces 530 W of power under typical test settings. The heat is less of a threat with this module: with one of the lowest temperature coefficients in the industry, SIL-530-XM loses just -0.29% of efficiency for every 1.8°F above 77°F.
