

60v inverter using 48v

Overview

In summary, while it is permissible to use a 60V battery with a 48V motor, careful consideration of the associated risks is essential. Users should ensure that their controllers are rated for higher voltages, monitor current draw closely, and be aware of potential overheating issues.

60v inverter using 48v

[How to step down from 60V so my 48V inverter will work](#)

I have a set of solar panels that put out a nominal 60V. My inverter is rated at 48V with a disconnect at 60V. When I connect them together, the inverter gives an over-voltage ...
