

Albania power generation container

Overview

How is energy used in Albania?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Is Albania a net energy importer?

Today, Albania remains a net energy importer as domestic energy production is not able to meet demand. When it comes to renewable energy imports, Eurostat data shows that the country ranks 8 th in Europe.

Are energy imports a problem in Albania?

Energy imports do not only have an adverse impact on the country's trade deficit, but they also pose significant risks to the country's energy security. Today, Albania remains a net energy importer as domestic energy production is not able to meet demand.

Does Albania need a diversified energy production mix?

The government of Albania seems to have already acknowledged the need for a diversified energy production mix. The Minister of Energy and Infrastructure, Belinda Balluku, has repeatedly highlighted that one of the key pillars of focus is the national strategy on energy diversification.

How much energy does Albania need to save?

According to these, Albania needs to achieve a 52 per cent share of renewables in gross final consumption of energy. To boost energy efficiency and energy savings, it also needs to cap primary energy consumption at 2.6 Mtoe and final energy consumption at 2.4 Mtoe by 2030.

Does Albania have a national strategy of energy?

Albania's Ministry of Energy recently launched an auction round for the construction of the country's first large-scale solar plant. The country also has a National Strategy of Energy, which aims to develop an effective energy sector that guarantees secur
