

# **Albania s container housing has its own power generation**

## Overview

---

The United Nations Development Program is supporting a program to install solar panels in Albania. The program has used \$2.75 million to support the installation of 75,000 m (810,000 sq ft) of solar panels. By 2010, 10,700 m (115,000 sq ft) of solar panels were installed and by 2014 the target had been met. There are 50,000 m (540,000 sq ft) of solar panels expected to be install.

Is the energy sector a sustainable source of growth in Albania?

The National Energy Strategy 2018 – 2030 states that the energy sector has the potential of being a sustainable source of growth for the country over the short to medium and long-term. Albania has the potential for increasing the amount of electricity produced domestically and therefore decreasing necessary energy imports.

Are energy imports a problem in Albania?

Energy imports do not only have an adverse impact on the country's trade deficit, but they also pose significant risks to the country's energy security. Today, Albania remains a net energy importer as domestic energy production is not able to meet demand.

How can Albania achieve a smart energy infrastructure?

Creation of a smart energy infrastructure: Supporting solar and wind energy source projects to diversify the renewable energy portfolio, harnessing Albania's ample sunlight and wind resources for clean power generation.

How is energy used in Albania?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Is Albania a net energy importer?

Today, Albania remains a net energy importer as domestic energy production

is not able to meet demand. When it comes to renewable energy imports, Eurostat data shows that the country ranks 8 th in Europe.

Does Albania need a diversified energy production mix?

The government of Albania seems to have already acknowledged the need for a diversified energy production mix. The Minister of Energy and Infrastructure, Belinda Balluku, has repeatedly highlighted that one of the key pillars of focus is the national strategy on energy diversification.
