

Algerian power generation equipment container

Overview

Which power plants are being built in Algeria?

Combined Cycle Power Plants: Biskra and Bellara Algeria's electricity generation capacity is set to grow with the construction of two major combined cycle power plants: Biskra and Bellara. Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW.

How many MW does Algeria's new power plant generate?

Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW. Both projects are expected to start operations in 2025 and are expected to enhance Algeria's power generation infrastructure while supporting energy security and fuelling the country's economic growth.

How much electricity does Algeria generate?

Algeria also had installed electricity generation capacity of 22.6 gigawatts (GW) and generated 96.3 GWh of electricity. Nearly all (97%) of Algeria's installed generation capacity is fossil fueled. The remaining capacity is hydroelectricity or other renewable sources. Algeria's installed capacity grew by about 42% over the past decade.

What is the power sector in Algeria?

Revised in May 2021, this map provides a detailed overview of the power sector in Algeria. The locations of power generation facilities that are operating, under construction or planned are shown by type - including liquid fuels, gas and liquid fuels, natural gas, nuclear, hybrid, hydroelectricity, solar (PV) and wind.

What are Algeria's key energy projects in 2025?

Algeria is advancing several key energy projects in 2025, aimed at increasing natural gas production, expanding electricity generation and enhancing renewable energy capacity.

Will Algeria build a one-gigawatt solar energy project in 2021?

Towards this end, Algeria launched a tender for a one-gigawatt solar energy project in 2021, comprised of building five power generation sites ranging from 50 to 300 MW each.
