

Are there solar panel factories in Albania

Overview

How many solar projects are in Albania?

The Albanian government has received requests from four companies looking to develop four separate solar projects located across the country. Albania's Ministry of Infrastructure and Energy has received expressions of interest from four companies looking to construct four solar projects with a cumulative capacity totaling 235 MW.

How much does solar cost in Albania?

Albania ran a 300 MW solar tender last year. The Ministry of Infrastructure and Energy shortlisted nine bidders with an average price of €0.0513 (\$0.054)/kWh offered across 283.9 MW of capacity allocated in July. The country had deployed 163 MW of solar by the end of 2023, according to figures from the International Renewable Energy Agency (IRENA).

Is Albania a good place for solar energy?

The climate in Albania is Mediterranean, so it possesses considerable potential for solar energy production. Mountain elevations provide good areas for wind projects. There is also potentially usable geothermal energy because Albania has natural wells.

What is the largest solar power plant in Albania?

In late 2023 the 140MW Karavasta solar power plant was completed, having taken Volterra of France 15 months to build, it is the largest in Albania to date. A 100 MW solar power project called Spitalla in Durrës area is planned to be built next. Albania has enormous potential for electric energy from wind power.

Why did Albania's solar plants increase in production last year?

ATA's report adds there was a fivefold increase in production from Albania's solar plants last year, mainly from the efficiency of the Karavasta photovoltaic

plant, a 140 MW site developed by Volitalia. Albania ran a 300 MW solar tender last year.

Does Albania still have wind power?

Albania recently saw through the first competitive bidding procedure for wind power. Hydroelectric plants still make up almost 100% of the country's electricity production. The government is working on diversifying the mix with solar power and facilitate the construction of its first wind parks and gas-fired power plants.
