

# **Are there subsidies for energy storage exports**

## Overview

---

How do government subsidies help energy storage enterprises?

Government subsidies alleviate the financial constraints of energy storage enterprises. Government subsidies promote R&D investment in energy storage enterprises. Differentiated subsidy strategies can generate higher TFP improvement returns. Government subsidies are an important means to guide the development of the energy storage industry.

Do government subsidies improve TFP of energy storage enterprises?

Government subsidies improve the TFP of energy storage enterprises. The government's "picking winners" subsidy strategy is effective. Government subsidies alleviate the financial constraints of energy storage enterprises. Government subsidies promote R&D investment in energy storage enterprises.

Do government subsidies affect the R&D of large-scale energy storage projects?

Government subsidies may have a stronger effect on the R&D of large-scale ESEs. Currently, the energy storage projects show a trend of continuous scale-up, and large ESEs are more likely to construct large-scale "wind power + PV + energy storage" projects.

Are government subsidies effective in reducing energy storage financing constraints?

Large ESEs with sufficient collateral and high technological maturity of their energy storage products are more likely to receive government subsidies and external financing from the banking sector. As a result, government subsidies are more effective in alleviating the financing constraints of large-scale ESEs.

What are the different types of energy storage incentives?

In addition, there are other types of energy storage incentives that have been

tried. For example, storage may be added to existing renewable programs, such as solar incentive programs, or be made eligible for market-based programs such as utility renewable portfolio standards (RPS).

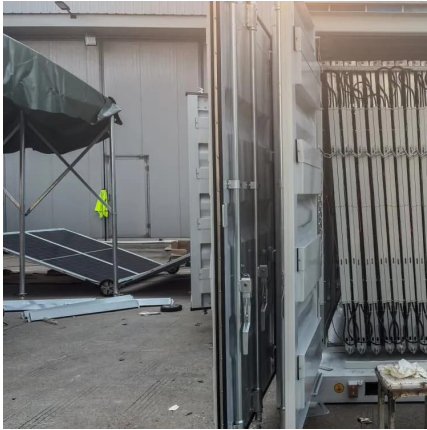

Is government's "picking winners" subsidy strategy effective in energy storage industry?

It can be concluded that the government's "picking winners" subsidy strategy in energy storage industry is effective. Table 4. MMQR results. Note: Standard errors in parentheses; \*, \*\*, \*\*\* indicate that the coefficient is significantly different from 0 at 90%, 95% or 99% confidence levels. Q (N%) indicates that TFP is at the N% quantile level. 5.3.

## Are there subsidies for energy storage exports
