

Argentina Zero Carbon Energy Storage Project Construction Plan

Overview

Does Argentina have a battery energy storage system?

Argentina has taken a major step toward modernizing its energy infrastructure with the launch of a 500 MW battery energy storage system (BESS) tender under the AlmaGBA program.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

Does Argentina have a battery storage tender?

Argentina has opened a \$500 million battery storage tender aimed at adding 500 MW of new energy storage capacity in the Buenos Aires metropolitan area. The AlmaGBA program, managed by CAMMESA, offers long-term contracts with fixed payments and financial guarantees to attract developers.

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.

Is hydropower a source of carbon-free energy in Argentina?

Hydropower is an important source of carbon-free energy in Argentina, making up about 16.5% of the country's electricity generation in 2022. As of 2023, Argentina had 33 hydropower plants, with a total capacity of 9,254 MW.

Does Argentina have a net zero World Initiative?

In 2021, Argentina became part of the Net Zero World Initiative, a program managed by the U.S. Department of Energy, aimed at helping countries reduce carbon emissions from their energy sectors. Argentina and the United States are closely collaborating on energy efficiency efforts.
