

Australian Energy Storage Container Specifications

Overview

What is a battery energy storage container - 10ft?

Purpose-built for BESS storage, this innovative container is designed to reduce battery fire risk. Storemasta's Battery Energy Storage Container - 10ft is proudly designed and made in Australia to meet the requirements of the Australian Standard AS/NZS 4681 - The storage and handling of Class 9 (miscellaneous) dangerous goods and articles.

What is a battery energy storage container (BESC)?

This Battery Energy Storage Container (BESC) is constructed with robust steel materials, based on a sturdy 10ft frame.

Is there an Australian standard for large energy storage batteries?

A major issue identified by ESV is the absence of an Australian Standard for large energy storage battery facilities. Efforts are being made to expedite the creation and subsequent release of an appropriate standard, however as an interim measure, technical guidance will represent an iterative update of the existing CEC guidance.

What is Australia doing about energy storage?

Australia is actively progressing along the risk development curve of energy storage and is one of the nations at the forefront of facility size and knowledge on the global level (e.g., Victoria Big Battery and the South Australian Hornsdale facilities).

Does Australia rely on overseas manufactured equipment for energy storage systems?

Australia is largely dependent on overseas manufactured equipment for energy storage systems. This guidance report consolidates learnings from the literature review, findings from stakeholder consultations, and broader industry knowledge to present a preliminary guide to approaching assessment

of grid-scale BESS facilities moving forward.

What are energy storage systems?

Energy storage systems involving a combination of storage types, for example battery and hydrogen energy storage systems (referred to as renewable energy hubs). Similar to all documentation, this guidance is an evolving document. From this engagement, multiple stakeholders have conveyed that other technical guidance is being developed.
