

Australian Local Photovoltaic Panel Manufacturer

Overview

Tindo Solar, based in Adelaide, is currently the only company manufacturing solar panels in Australia, although other companies assemble imported panels. Tindo Solar panels are designed to withstand Australian conditions and offer high performance and reliability. Who is Australia's largest solar panel manufacturer?

We are Australia's largest solar panel manufacturer. Our focus is providing our customers with the top quality engineering solutions. We manufacture 300w-550w premium solar panels with industry leading reliability and performance warranty. Our high efficiency solar module comes with 25 year product and 25 year performance warranty.

What is the current landscape of solar technology manufacturers in Australia?

Let's dive into the current landscape of solar technology manufacturers in Australia. Australia has a rich solar research and development history, but establishing a solid domestic manufacturing sector has proven difficult. Historically, Australian solar manufacturers have faced stiff competition from overseas producers who offer cheaper panels.

How can Australia support local solar production?

Recognising the strategic importance of the domestic solar industry, the Australian government has launched several initiatives to support local production. Tindo Solar is an Australian-owned manufacturer that produces solar panels domestically. Established in 2011, they prioritise high quality by assembling panels with international components.

How many solar panels are installed in Australia?

Australia's solar sector has witnessed an exemplary upsurge in the past decade. As per the Clean Energy Regulator's data, over 3.5 million solar panel systems were installed across Australia by the end of 2022, with the trajectory set to steadily climb.

Why are Australian companies investing in solar energy?

Australian companies are pioneering solar technology, creating jobs, and boosting the economy. Explore local manufacturers and how government initiatives support this growing industry. Australia boasts some of the highest solar energy potential today.

Why are Australian solar panels so expensive?

Historically, Australian solar manufacturers have faced stiff competition from overseas producers who offer cheaper panels. This, coupled with a lack of government support, limited the growth of local manufacturing capabilities.
