- There are 2 , 160 and 1 radio broadcast stations, with several hundred FM repeaters.
- There were 6.08 million radios in Austria in 1997.
- There are 45 broadcast television stations, with in excess of 1.

What is Telecommunications in Austria?

Telecommunications in Austria encompass highly developed and efficient internet and telephone networks, complemented by a number of radio and television broadcast stations. In the 2022 Digital Economy and Society Index (DESI) report, Austria ranks 10th among 27 European Union (EU) countries.

How many radio stations are there in Austria?

Drei: Owned by Hutchinson Whampoa, a Hong Kong based company that runs its own UMTS network. There are 2 AM, 160 FM and 1 shortwave radio broadcast stations, with several hundred FM repeaters. There were 6.08 million radios in Austria in 1997. There are 45 broadcast television stations, with in excess of 1000 repeaters.

How many satellite stations are there in Austria?

Fibre-optic coverage is extensive, although it remains very expensive. A full

range of telephone and Internet services are available via the network. Austria has 15 satellite earth stations, two Intelsat (one Atlantic Ocean and one Indian Ocean) and one Eutelsat. Additionally, there are around 600 very-small-aperture terminals (VSATs) (2007).

What GSM network does Telekom Austria use?

D-Netz by Telekom Austria. This network was switched off at the end of the 1990s. There are three nationwide GSM networks which also support additional brands and mobile virtual network operators (MVNOs). A1: originally Mobilkom. It now runs a mixed GSM-900, GSM-1800 and UMTS network.

What is T-Mobile Austria's network strategy?

T-Mobile Austria is relying on network diversity in its build-out strategy. In rural regions, 5G and LTE will bring fast internet even to Austria's most remote valleys. In suburban areas, hybrid and DSL will be added to provide fast internet. In cities, broadband internet will be provided by the fiber-optic network and other technologies.

Can Austria become a 5G pioneer?

Austria's modest population of 8.9 million people has made it possible for the small country to become somewhat of a 5G pioneer, according to many accounts. Austrian operators hope to deploy 5G services at main traffic routes by the end of 2023 and have planned to have nearly nationwide 5G coverage by the end of 2025.
