

BESS prices for photovoltaic panels in the UK

Overview

How much does a photovoltaic system cost in the UK?

- A household in the UK installs a 5kW photovoltaic system costing £8000 (average cost), which would generate approximately 4320 kWh of electricity annually.
- The annual SEG income in the UK would be £324 per annum.

How much VAT do solar panels & batteries cost?

0% VAT: No VAT on solar panels or batteries until March 2027, saving ~£2,850 on a 4.0 kWp system. Smart Export Guarantee (SEG): Earn 4-15p/kWh for excess energy. Compare suppliers for the best rate.

Can I get a SEG install exclusive If I buy solar panels?

If you buy solar panels and a battery from Ovo, and Ovo supplies your energy, you'll be eligible for the SEG Install Exclusive of 20p/kWh. Scottish Power installs solar panels and batteries throughout Great Britain. Solar panels cost from £4,972 for a 4-panel package, while batteries start from £3,057 if installed along with solar panels.

How do I get the best price for solar panels?

One of the most effective ways to secure the best price for solar panels is to request quotes from at least three different installers. Each company will have its own preferred brands, labour rates, and approach to installation, so prices can vary widely.

Should you choose polycrystalline or monocrystalline solar panels?

These panels represent the premium choice in solar technology. Conversely, polycrystalline panels, while not as efficient as monocrystalline panels, are more affordable, making them an attractive option for budget-conscious homeowners. When making this decision, it is important to weigh the initial investment against potential long-term savings.
