

# **Bahrain PV Energy Storage Subsidy**

## Overview

---

Are Bahrainis willing to pay the full cost of solar PV systems?

According to the cross tabulation results, majority of participants who were willing to pay the full cost of residential solar PV systems were Bachelor degree holders with the average per-capita monthly income for Bahrainis.

Why are there no barriers to solar PV installation in Bahrain?

None of the participants mentioned any reported barriers to installation of solar PV in Bahrain. This is likely because solar panel installation is relatively new in Bahrain and the participants were not clear on the specifics involved. Effective dissemination of information is necessary, as explained later.

Is solar PV a social issue in Bahrain?

Although there are fewer peer-reviewed studies on the social aspects of solar PV compared to technical studies, the present research sheds light on public perspectives on this topic in Bahrain. In fact, it used a cross-sectional design for this purpose.

What is the EV policy in Bahrain?

In 2021, the Kingdom issued the “Electric Vehicles Technical Regulation”, to promote and adopt green transport in Bahrain. In 2023, the Ministry of Electricity and Water Affairs awarded a contract for the development of an electric vehicle (EV) strategy for the Kingdom.

How many megawatts will Bahrain produce by 2025?

Bahrain will have to produce 280 megawatts of electricity from renewables by 2025, increasing to 710 megawatts by 2035, to meet the country’s renewable energy targets.

Can 'district cooling' improve the efficiency of air conditioning in Bahrain?

As a result, Bahrain is looking to utilize the practice of “district cooling” to increase the efficiency of air conditioning by as much as 50 percent. Bahrain generates approximately 2.6 kg of solid waste per person per day.
