

# Bangladesh Smart Solar PV Site

## Overview

---

On April 3, 2023, Wuling Power Corporation Ltd., started the construction of its first integrated smart energy project in Bangladesh, a 55 MW rooftop PV power + 5 MW energy storage project. Where is Bangladesh's solar power plant located?

Located in the Mymensingh district, 100 km north of Dhaka, the solar plant secured last year a 20-year power purchase agreement (PPA) with the Bangladesh Power Development Board. It was built with an investment of around \$90 million and will supply power at an unspecified price to the national utility, Power Grid Company of Bangladesh.

Where can I buy solar panels in Bangladesh?

Bangladesh Solar Power & Electric Industries Ltd., a sister concern of GTS GROUP, located at 63/1, Siddeshawri (2nd Floor, New Circular Road, Dhaka 1217, Bangladesh, is one of the leading Solar Panel manufacturers in Bangladesh.

Why are solar home systems so expensive in Bangladesh?

Current solar home systems are limited in capacity and continue to remain prohibitively expensive for a large portion of the 65 million people who do not have access to the grid in Bangladesh. As a result, they rely on costly and unhealthy alternatives like diesel generators and kerosene lamps.

Are Solar Homes a viable option for off-grid households in Bangladesh?

Of the off-grid population, the vast majority is concentrated in rural Bangladesh where the electrification rate dips to 28%. Individual solar home systems are limited by their initial capacity and cannot serve more or any larger electricity consuming devices.

How many nanogrids will solshare operate in Bangladesh?

In Bangladesh, based on the already 4+ million SHS installed in the field,

SOLshare expects to operate more than 10,000 nanogrids by the end of 2030, which are expected to supply more than 1,000,000 customers in Bangladesh. Images owned by the activity partners, all rights reserved.

Can solar power be traded through a village grid?

Trading renewable electricity through a SOLshare village grid can unlock at least up to 30% excess generation capacity of existing solar home systems. Through usage of the full power generation capacity, more people benefit from a clean, reliable source of electricity at a low cost.
