

Battery cabinet on Black Mountain Street

Overview

Can Black Mountain Energy Storage build a battery energy storage facility?

Black Mountain Energy Storage is currently seeking to lease or purchase land to build battery energy storage facilities. A property needs to be at least 5-10 acres and located near or adjacent to existing electric transmission infrastructure in order to comfortably accommodate a battery energy storage facility.

Who is Black Mountain Energy Storage?

Leveraging cumulative decades of electric market experience, Black Mountain Energy Storage develops powerful, flexible, and strategically placed battery energy storage projects to foster a resilient electric grid. BMES' quickly expanding team of energy experts are fast actors in pipeline development of utility-scale energy storage solutions.

Why do we need a backup battery cabinet?

Through cutting-edge research and innovation, advanced engineered power products for backup battery cabinets have become essential to our energy future. When the power goes out, battery backups ensure that the Internet, cloud-based data, financial and health records stay accessible.
