

Bifacial double-glass module specifications

Overview

Assembled with 11BB bifacial PERCIUM cells and gapless ribbon connection technology, these double glass modules have the capability of converting the incident light from the rear side together with the front side into electricity, providing higher output power, lower temperature coefficient, less shading loss, as well as enhanced tolerance for mechanical loading.

Bifacial double-glass module specifications

[BIFACIAL SERIES - GLASS-TO-GLASS PHOTOVOLTAIC ...](#)

The bifacial dual sided glass module (G2G) generates more electricity by converting direct, radiant and scattered solar energy on both the front and the back side of the module. The ...
