

Brazilian bifacial solar panel manufacturer

Overview

What are bifacial solar panels?

Bifacial solar panels (modules) have solar cells on both sides of the unit, with glass on the front and a clear fluoropolymer sheet on the back, allowing them to produce up to 25% more energy than the typical monofacial solar panel widely used today. Bifacial modules can be used with standard racking and inverters for any type of solar array.

Are bifacial solar panels available in the UK?

Currently, a handful of manufacturers offer bifacial solar panels in the UK. Below are the available models, all of which are monocrystalline. As time goes by, we're sure to see more manufacturers release their own bifacial solar panels.

How many bifacial panel manufacturers are there?

There are 344 bifacial panel manufacturing companies listed below in the 'Bifacial -- Solar Panel Manufacturers - High Efficiency Crystalline' title.

Brazilian bifacial solar panel manufacturer

[The World's Greenest Solar Module: Brazil's locally](#)

Brazil has taken a significant step in this direction with the production of TOPCon N-Type bifacial glass-glass solar modules featuring the lowest CO₂ footprint in the world.
