

# **British Energy Storage Power Station Procurement**

## Overview

---

How many GW of prequalified battery energy storage systems are there?

Out of 6.9 GW of prequalified battery energy storage systems (BESS), equal to 1.9 GW derated capacity, about 1.8 GW of derated BESS secured 15-year contracts in the UK's T-4 auction – nearly double last year's volume. Just a week earlier, the T-1 auction also set a record for BESS procurement. From ESS News.

Is Coalburn a good investment in UK energy storage?

The 500MW/1,000MWh Coalburn project in Scotland, UK, currently under construction. Image: CIP. Despite a 12% year-on-year fall in the capacity of newly submitted planning applications in 2024, there is still a strong interest in the UK energy storage market as a whole.

How many battery energy storage units are there?

A total of 111 battery energy storage system (BESS) units were awarded contracts totaling around 1.8 GW of capacity, which is two times the volume procured last year. All this capacity was new build with the exception of around 25 MW, including 21 MW of capacity awarded to one-hour assets and 4.4 MW awarded to two-hour assets.

How many storage projects are in the T4 capacity market auction?

Longer duration storage projects have increased their share in the T-4 Capacity Market Auction, with a total of 404 MW of capacity secured for four-hour duration projects, 189 MW for five-hour duration projects, 31 MW for six-hour projects, and almost 240 MW secured for eight-hour duration projects.
