Can I use a power plug adapter in Haiti?

You can also consider a combined power plug adapter/voltage converter. If the frequency in Haiti (60 Hz) differs from the one in your country, it is not advised to use your appliances. But if there is no voltage difference, you could (at your own risk) try to use the appliance for a short time.

What type of plugs are used in Haiti?

The power plugs and outlets used in Haiti are the types A and B plugs. The type A plug has two flat contact pins. The type B plug has two flat parallel pins, as well as a round grounding pin. What is the voltage and frequency in Haiti?

The standard voltage used in Haiti is 110 V and 60 Hz.

What voltage is used in Haiti?

The standard voltage used in Haiti is 110 V and 60 Hz. Travelers from countries with a standard voltage between 110 V and 127 V, such as Canada, the US, and South America, can use electric appliances in Haiti without voltage converters. This is because manufacturers take slight deviations of up to plus or minus 5% in voltage into account.
