

# Canadian new energy site put into operation

## Overview

---

What are some of Canada's largest energy projects?

The largest projects include the Chamouchouane zone wind farm (\$9.0B), TES Canada Green Hydrogen plant (\$4.0B), Champlain Hudson Power Express Transmission Line (\$2.2B), the Whabouchi Lithium Project (\$2.1B), and the Odyssey mine extension project (\$1.7B).

Is Canadian nuclear power a viable option?

As countries look to secure safe sources of clean energy, demand for Canadian nuclear is growing. The Government of Canada is acting now to modernize Canadian-owned CANDU technology, which will provide a viable, cost-effective design in support of the expansion of nuclear energy capacity in Canada and internationally.

What will happen at Site C at BC Hydro?

B.C. Hydro says that, now that the final generating unit is operational, future construction work at Site C will consist of completing the powerhouse and generating station and paving access roads. The utility estimates it will serve B.C. Hydro customers for the next century, and is now providing enough electricity to power 500,000 homes.

What happened at Site C hydroelectric project?

The reservoir at the Site C hydroelectric project on Aug. 25, 2024, as it was filling with water. (B.C. Hydro) After decades of starts and stops, the Site C hydroelectric dam in northeast B.C. has started generating electricity to be fed into the provincial power grid.

Where is Canada's New Oil & Gas Office located?

The new office will be based in Calgary, Alberta, the center of Canada's oil and gas industry. Dawn Farrell, the head of the new office, is a former chief executive of an oil pipeline company owned by the federal government. All the

projects announced on Thursday are already underway.

Where is Canada's New Oil & Gas Clearinghouse based?

On Wednesday, the prime minister announced a council of Indigenous people that will advise a new office he created to act as a clearinghouse for approving and financing major infrastructure. The new office will be based in Calgary, Alberta, the center of Canada's oil and gas industry.
