

Cape Verde single-phase inverter

Overview

Where can SolarEdge inverters be used?

SolarEdge inverters can be used in many different countries. This document details countries where SolarEdge approves installation of its inverters. Installation should always be done in compliance with local regulations, and in case of a conflict between local regulations and this document, local regulations apply. Luxembourg, UK, Italy updates.

Can a 220 230 volt inverter be connected to a grid?

Can be connected to the following grid: 220/230V True Delta Inverter AC power is limited; requires inverter adjustment. For details refer to the application note Can be connected to the following grid: 220/230V True Delta Inverter AC power is limited; requires inverter adjustment.

Can I use SolarEdge inverters with backup?

Using SolarEdge Inverters with backup requires an External Disconnection Unit (BUI – Backup Interface). For additional information, refer to documentation available in the knowledge center on our website.

What is inverter country setting?

Inverter country setting: to what country setting the inverter should be configured in order to comply with the local grid requirements including comments if required. Some countries have a submenu that should be used; sub-entries are indicated with the following symbol: ->.

Can a transformer connect a supported inverter to a non-supported grid?

In supported countries, connection of supported inverters to non-supported grids is permitted through a transformer, if the secondary connection (transformer connection to the inverter) is identical to a supported grid. Transformer procurement, installation, maintenance, and support are the responsibility of the installer.

Do I need to adjust my inverter?

Inverter AC power is limited; requires inverter adjustment. For details refer to the application note Harmonics to 100th level are required. Northern Ireland Type B starts at 100 kW
