

# Capital Chuangjie New Energy Station

## Overview

---

Will Changzhou city build a new energy capital?

On January 28, the first meeting after the Spring Festival in Changzhou City clearly proposed to build a new energy capital. With a total investment of more than 47 billion yuan, a total of 15 major new energy industry projects have been signed and settled.

What is the output value of Changzhou's new energy sector?

Official data shows that, in 2022, the output value of Changzhou's new energy sector exceeded 500 billion RMB. Three industries, including power batteries, new energy vehicles and the photovoltaic industry increased by 96.5 percent year-on-year, contributing 102.2 percent to the growth of the city's industrial output value.

Is Changzhou a good place to invest in energy?

With a comprehensive new energy ecosystem covering power generation, storage, transmission, and utilization, Changzhou ranks 4th in industry concentration and 1st in investment intensity nationwide. Power Generation: Changzhou boasts a thriving photovoltaic (PV) power generation industry, with complete sector coverage.

What is Changzhou's new energy industry agglomeration?

More than ten years ago, Changzhou had already deployed new energy in many fields. At present, Changzhou's new energy industry agglomeration has reached the fifth place in China. CATL, SK, CALB, and SVOLT, four leading companies of power battery are all set in Changzhou. The power battery drives the accumulation of the vehicle.

What are Changzhou's new energy policies?

In late January, Changzhou released two policies to advance its development in the new energy sector. It proposes to promote the use of new energy in all

fields across the city, strengthen intelligent and digital transformation, and improve the industrial chain in power generation, energy storage, transmission and application.

How did Changzhou develop its power battery industry?

Back in 2010, Changzhou began its exploration of power batteries. Enterprises both foreign and domestic, along with research institutes cooperated in R&D, helping the city establish its position very early on. Relying on power battery advantages, Changzhou gained momentum in developing its new energy industry.
