The minimum installation distances for the charging pile are: no less than 700 mm from the back door to the wall, and no less than 500 mm from the side face to the wall. (5) The canopy is built together with the charging pile. (6) This installation method is just a sample for reference.

What are pilot EV charging solutions?

Our Pilot EV charging solutions transform your charging points into solar-powered systems, boasting higher efficiency than traditional grid supply. Improve your charging services with on-site energy storage systems, optimize energy costs, and manage power peaks with smart, integrated technology.

Why is Panasonic a leading energy storage company?

Thanks to a wide and varied portfolio of solutions, Panasonic has positioned itself as one of the leaders in the energy storage vicinity. Panasonic is one of the industry's top names due to its advances in innovative battery technology alongside strategic partnerships and extensive experience in manufacturing high-quality products.
