

Chilean solar photovoltaic panels

Overview

In November 2024, Chile's solar power generation capacity was projected to quadruple until 2060, in order to help decarbonize Chile's electricity generation. Energy storage will play a key role in taking in excess supply during the day and releasing it during the night.

Solar power in Chile is an increasingly important source of energy. Total installed photovoltaic (PV) capacity in Chile reached 11.05 GW in 2023. In 2024, Solar energy provided 19.92 TWh of electricity generation in Chile.

In 2013 the Atacama 1 solar complex was proposed as a 110 MW electric plant (the first in Latin America) and a 100 MW photovoltaic plant. The solar thermal plant.

In June 2014, the 100- (MW) Amanecer Solar CAP, a located near in the was inaugurated. It was developed by the.
