

Communication base station inverter installation process

Overview

How do I install the communication interface on my inverter?

Plug the communication interface to the left of the interface slot. The far right pins on the lower row of pins remain free. 3. Set the NetID (see Section 4.3 „Setting the Bluetooth Communication“ (Seite 13)). 4. Close the inverter as described in the inverter installation guide. ☒ The communication interface is installed.

How do I connect my inverter to the Monitoring Platform?

Open SetApp and follow the on-screen instructions on your mobile device to connect to the inverter. In case the inverter is not connected to the monitoring platform via Ethernet or cellular, these instructions include setting up communications to the monitoring platform. 3.

What are the characteristics of different communication methods of inverters?

The characteristics of different communication methods of inverters are obvious, and the application scenarios are different. In order to better weave the underlying network of energy digitization and intelligent development, choose the most appropriate communication method according to local conditions.

How do I connect my inverter to my mobile device?

1. Turn ON the AC circuit breaker on the main distribution panel, if applicable turn ON the Safety Switch. *I n i t i a l i z i n g . .* 2. Open SetApp and follow the on-screen instructions on your mobile device to connect to the inverter.

How does a low voltage inverter work?

The data signal is connected to the low-voltage busbar through the power line on the AC side of the inverter, the signal is analyzed by the inverter supporting the data collector, and the communication is finally connected to the local power station management system or the cloud platform through the

LAN or the Internet 2. Application scenario 4.

How to install an inverter cover?

Attach the inverter cover and secure it by tightening the screws with a torque of 3.0 N*m/ 2.2 lb.*ft. For proper sealing, first tighten the corner screws and then the two central screws. 1. Turn ON the AC circuit breaker on the main distribution panel, if applicable turn ON the Safety Switch. I n i t i a l i z i n g . .
2.
