

# **Communication base station solar photovoltaic silicon wafer manufacturer in China**

## Overview

---

Who are the leading manufacturers of silicon & wafers in China?

The increased production capacity of silicon and wafers consolidated the leading positions of the top ones, and the newly added producers such as HOYUAN, JYT, Gokin Solar and Shuangliang expanded their capacity to catch up with the major players.

Where are silicon wafers made?

The other two newly emerged stars also achieved record-high growth with prominent profits despite comparatively lower volumes. Currently, most of the world's silicon wafer production capacity is located in China, where all of the top 10 manufacturers are based.

What are the business models for PV Silicon wafer enterprises?

There are mainly two types of business models for PV silicon wafer enterprises: the “vertically integrated” model adopted by LONGi Green Energy, TCL Zhonghuan, JinkoSolar and JA Technology, while Shangji Automation, Shuangliang Eco-energy, Jiangsu Meike and JingYuntong adopt the “independent and specialised” model.

What is a solar wafer?

For every solar energy system, a wafer is one of its most important components. This is because a wafer, also called a slice or substrate, is a thin slice of semiconductor, such as crystalline silicon, that is used for the fabrication of integrated circuits and, in the case of photovoltaics, to manufacture solar cells.

Who owns the solar photovoltaic wafer market?

The solar photovoltaic wafer market is fragmented. Some of the major companies (in no particular order) include Jinko Solar Holding Co., GCL-Poly Energy Holdings Limited Ltd, LONGi Green Energy Technology Co Ltd, CETC

Solar Energy Holdings Co, and Sino-American Silicon Products Inc. Need More Details on Market Players and Competitors?

.

Are solar wafers becoming more competitive in China?

Typically the terrain of LONGi Green Energy, which has dominated the market for the past six years, the solar wafer production field in China is becoming increasingly competitive, with other companies keen to capitalise on the high demand for silicon wafers.
