

Comoros Communication Base Station EMS Company

Overview

The project has been developed by Qatar University and Politecnico di Torino, under the supervision of prof. Mazen Hasna and prof. Daniele Trincherro, with a major participation of local actors (Comorian Government, NRTIC, University of the Comoros).

In large part thanks to international aid programs, Moroni has international telecommunications service. Telephone service, however, is largely limited to the islands' few towns.

In October 2011 the State of Qatar launched a special program for the construction of a to interconnect the three islands of the archipelago, by.

Telephones – main lines in use: 5,000 (1995)Telephones – mobile cellular: 0 (1995)Telephone system: sparse system of radio relay and HF radiotelephone communication stations domestic: HF.

How did the Comoros project address telecoms?

The Comoros project addressed telecoms from several angles. The World Bank and IFC advised the government on liberalizing the sector, including by supporting development of the 2014 Communications Act.

Does Comoros have a telecom monopoly?

In 2013, Comoros was one of the few countries worldwide with a telecoms monopoly. The state-owned enterprise, Comores Télécoms, charged customers a high price but provided poor services. Consequently, only 40 percent of the country's 800,000 people had mobile service, and less than 1 percent had broadband internet.

Did Comoros get a second telecom license?

Instead, in 2015, with World Bank support, the Comoros' telecoms regulator (ANRTIC) held an international tender for a second telecoms license. This attracted African bidders Telecom Malagasy S.A. and Mauritius Telecom, and international firms, including France's SFR.
