

Container Power Generation Operating Procedures

Overview

What is a containerized generator set?

() On a regular basis, containerized generator sets (CGS) are placed onboard ships to provide replacement power in case of damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers.

What is a portable generator?

Portable generators are internal combustion engines used to generate electricity. They are useful when temporary or remote power is needed, and are commonly used during cleanup and recovery efforts following disasters such as hurricanes, tornadoes, etc.

What is a dual pack generator?

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or two 625 kW generators to achieve 1250 kW. This dual configuration increases the longevity of the overall unit by preventing the effects of light loading.

What is a Tier 4 containerized generator?

Our Tier 4 containerized generators are high-powered —500 kW to 1250 kW— units packaged in 30-foot or 48-foot ISO containers.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What is a generator SOP?

Generator SOPs can also be used as a training and induction document. The primary goal is to protect workers from injury or illness by outlining a safe system of work and providing adequate training and instruction. This form is broadly aligned with AS45001:2018. This Generator SOP should be communicated to workers before they complete the task.

Container Power Generation Operating Procedures

Container-Based Power Station

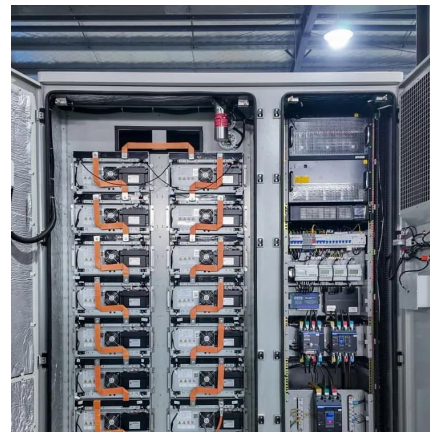

This innovative system is a fully autonomous electricity generation station, assembled from six High Cube 40-foot containers. The station is delivered in a Plug & Play format -- all you need ...
