

Container base station equipped with solar energy

Overview

A shipping container solar system is a modular, portable power station built inside a standard steel container. A Higher Wire system includes solar panels, a lithium iron phosphate battery, an inverter—all housed within a durable, weather-resistant shell.

Container base station equipped with solar energy

Off Grid Power at Cordillo Downs Station in South Australia.

For many years Cordillo Downs Station relied on diesel power and an ageing solar system. The setup was fuel-hungry, costly and increasingly unreliable. The property also lacked appropriate ...
