

Cost of solar photovoltaic panels in Greece

Overview

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. How much does a solar system cost in Greece?

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Using the per-watt figure above, a solar installation costs about €8,600, or €6,450 after the federal solar tax credit of 25% is applied.

Why are solar panels so expensive in Greece?

Global demand, industrial accidents, environmental disasters, exchange rates and the impact of the coronavirus pandemic could all be contributing to a rapid rise in the cost of solar power panels in Greece since the beginning of July. Industry sources reported price hikes of up to 25%.

How many mw a year does Greece install a photovoltaic system?

Auctions have replaced FITs and after stagnating since 2013, as of 2019 Greece was again installing hundreds of MWp per year. By April 2015, the total installed photovoltaic capacity in Greece had reached 2,442.6 MW p from which 350.5 MW p were installed on rooftops and the rest were ground mounted.

Why is solar power so popular in Greece?

Solar power in Greece has been driven by a combination of government incentives and equipment cost reductions. The installation boom started in the late 2000s with feed-in tariffs has evolved into a market featuring auctions, power purchase agreements, and self-generation.

How many solar panels are installed in Greece?

By April 2015, the total installed photovoltaic capacity in Greece had reached

2,442.6 MW p from which 350.5 MW p were installed on rooftops and the rest were ground mounted. Greece ranks 5th worldwide with regard to per capita installed PV capacity.

Why are solar prices rising in Greece?

Industry sources reported price hikes of up to 25%. Investors in solar power in Greece are concerned because of a sharp rise in prices for the equipment in the past two months, reversing the declining trend in the cost of photovoltaic technology registered over the past years, according to a local media report.
