

Cost price of German battery swap cabinet sites

Overview

How are battery swap stations installed?

The battery swap stations are installed under the supervision of a qualified specialist company, which takes care of the structural requirements and, if necessary, the power connections. Specifications for a standard battery swap station for e-cars (small hub) and e-buses (big hub: as of 2019):.

How many battery swaps per day & station?

This allows up to 1000 swaps per day and station. Our battery swap technology combines highest quality with minimum resource usage and total cost of ownership (TCO) and optimal working speed with the latest monitor technology. 40% of our equipment comes from EU manufacturers. Dies Video kann in Ihrem Browser nicht wiedergegeben werden.

How long does a battery swap take?

The e-vehicle (up to 3.5 t) drives on a ramp into the swap box and stops directly above the swap system; after the swap process, the customer can pay immediately and continue the passage without interruptions and hesitation. With INFRADianba's battery swap technology, battery swap is technically possible within only 20 seconds.

How does a battery swap work?

The standard procedure includes the battery swap through a swap frame in the vehicle floor by means of a robotic system that delivers filled batteries from a battery storage. This battery storage ensures the continuation of the process through permanent recharging and a small battery stock (factor ≥ 1.06).
