

Cpn100kw inverter

Overview

What is a CPS 100kW inverter?

High efficiencies, wide operating voltages, broad temperature ranges and a NEMA Type 4X enclosure enable this inverter platform to operate at high performance across many applications. This CPS 100kW inverter ships with the Standard Wire-box.

How many strings can a CPS flexom inverter handle?

The Standard Wire-box includes touch safe fusing for up to 20 strings. The CPS FlexOM Gateway enables communication, controls and remote product upgrades. The 100kW high power CPS three phase string inverters are designed for ground mount applications with 480Vac service voltage.

How do I fix a CPS inverter not starting up?

Contact CPS customer service. If the inverter can start up, recalibrate. If the inverter consistently reports this alarm and cannot start up, replace the inverter. Turn OFF the AC switch to disconnect the inverter from the grid. Open the fuse drawers to de-couple the PV strings from each other. Test strings with a string test set.

How many volts can a CPS sch100ktl-do/us-480 inverter run?

Operating DC input voltage range for CPS SCH100KTL-DO/US-480 inverters: 750-1450 VDC. Max. DC input voltage: 1500 VDC. Long Service Life: Uses thin-film and electrolytic capacitors to extend inverter's service life.

What is a CPS sch100/125ktl 3 phase string inverter?

CPS SCH100/125KTL 3-phase string inverters are designed for use with an UNGROUNDED PV array in large-scale PV grid-tied systems. The system is generally made up of PV modules, PV inverters, and AC power distribution equipment (Figure 2-1).

How do I Turn on the inverter?

Manual Turn ON/OFF: Required after regulation setting or manual (fault) shutdown. Tap the TURN ON/OFF icon at the bottom of the screen. Select Turn ON to start the inverter. If the startup condition is met, the inverter will turn on and operate normally. Otherwise, the inverter will go into standby mode.
