

Croatia Industrial and Commercial Solar Power Generation System

Overview

How much solar energy does Croatia produce?

Current deployment is made up of approximately 655 MW on commercial and industrial (C&I) rooftops, 155 MW on residential rooftops, and 62.1 MW of large-scale solar installations. Croatia ranks at the bottom of the European Union for total solar energy production, generating about 3% of its annual electricity.

What is Croatia's solar energy potential?

"Croatia's solar energy potential estimated at 6.8 GW". Balkan Green Energy News. Retrieved 18 March 2022. ^ Spasić, Vladimir (10 November 2021). "Croatia to add 1.5 GW of renewables by 2025". Balkan Green Energy News. Retrieved 18 March 2022.

Does Croatia have a solar market?

The Renewable Energy Sources of Croatia Association (RES Croatia) says Croatia's solar market is growing year over year. But with residential and industrial rooftops accounting for most new installations, a key focus is enabling utility-scale growth. Croatia installed 397.1 MW of solar in 2024, according to figures from RES Croatia.

How many solar projects are there in Croatia?

Among the solar projects announced in Croatia last year were a 99 MW site scheduled for commissioning in 2026 and a 189 MW facility, set to be the country's biggest plant to date. Croatia held a renewables auction in summer 2024 that awarded more than 400 MW of solar across two categories.

How much solar power does Croatia have in 2023?

Croatia's Renewable Energy Sources Association announced that Croatia grew its installed solar plant capacity from 224 MW to 305.8 MW in the first six months of 2023 alone.

Is Croatia a good place for solar energy?

According to U.S. consulting firm BCG, Croatia has significant untapped potential for solar energy usage with one of the highest levels of solar radiation in Europe (3.4-5.2 kWh/m²day), but one of the lowest levels of installed photovoltaic capacity per capita (15.6 Wp).
