

Cyprus Integrated Energy Site

Overview

What is Cyprus grid?

Cyprus Grid provides comprehensive insights into the real-time and historical electricity generation data of Cyprus. Whether you're tracking renewable energy contributions or examining generation curtailments, we offer the data you need to stay informed about Cyprus's energy landscape.

Why is Cyprus developing its electricity market?

Cyprus has put all its efforts into developing its electricity market, aiming to alleviate energy curtailments and improve energy security.

Who is responsible for energy issues in Cyprus?

The institution responsible for energy issues in Cyprus is the Ministry of Energy, Commerce and Industry, while climate change is the responsibility of the Ministry of Agriculture, Rural Development and Environment and in particular the Department of Environment.

Why is Cyprus a small energy system?

Cyprus is a small isolated energy system, with high dependency on oil products for its energy needs. More than 90% of Cyprus energy inland consumption is from oil products and the rest is from renewables.

Does Cyprus comply with the energy union governance regulation?

Existing policies and measures (Stage 1 of the national climate policy) are clearly insufficient to lead Cyprus to compliance with its obligations stemming from the Energy Union Governance Regulation.

What is the current PCI for electricity in Cyprus?

The current PCI in Cyprus for electricity is EuroAsia interconnector which is categorised according to EU Regulation 347/2013/EC in NSI East electricity

corridor. The PCIs for gas, EastMed Pipeline and CyprusGas2EU, are both categorised in SGC gas corridor.
