

Cyprus PV energy storage system prices

Overview

Current pricing runs €800-1,000 per kWh installed – a 10kWh system totals €8,000-10,000 before grants. Government subsidies immediately reduce this by up to €5,000, bringing your actual investment to €3,000-5,000. Which simply means payback in 3-5 years at current electricity rates. What is a commercial photovoltaic system in Cyprus?

Commercial photovoltaic systems in Cyprus are usually used by businesses for self-consumption. That is, the energy generated by the solar panels is solely used for the building where the panels are installed.

Does Cyprus support photovoltaic systems?

The government of Cyprus, along with the RES and Energy Conservation Fund, offers support schemes for the installation of photovoltaic systems. This is because solar power is considered to be the future of energy and promoting the use of renewable energy sources is a priority.

What are solar panels used for in Cyprus?

Solar panels in Cyprus are used for residential, industrial and commercial properties. Other than home use, many businesses install photovoltaic panels in Cyprus for self-consumption. That is, they use the energy the photovoltaic system generates directly, but cannot store any excess energy for following months.

Where can photovoltaic panels be installed in Cyprus?

Photovoltaic systems can be installed on flat and inclined roofs and on the ground. Our team can visit the place where you want the solar panels to be installed, evaluate the amount of space, sun exposure and possible shading and suggest the best place so that you make the most out of your photovoltaic panels in Cyprus.

How much energy does a PV system produce in Cyprus?

The energy produced in Cyprus from 1 kW PV system is estimated at 1650 kWh per year. From PV projects we have already installed in Cyprus we have seen that, in many cases, the energy produced is much higher. Examples of energy savings from 3, 4 and 5 kW PV systems for their first year of operation can be found in the table below.

What is a solar pump in Cyprus?

Solar pumps in Cyprus are pumps that work with the energy generated by solar panels. Solar pump maintenance is very important to ensure that the system works as it should and that the water is clean.
