

Cyprus has a battery cabinet production company

Overview

Could a battery-based electricity storage system be developed in Cyprus?

Also read X Major global companies like Tesla and Samsung have expressed interest in developing a battery-based electricity storage system in Cyprus, according to Minister of Energy, Trade, and Industry George Papanastasiou.

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as “the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems,” adding: “During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts.”.

Can Cyprus become an energy hub?

The strategy is built on three pillars aimed at transforming Cyprus into an energy hub. The first pillar is the rapid establishment of a liquefied natural gas (LNG) import terminal for power generation.
