

Czech photovoltaic power generation and energy storage installation

Overview

The had almost two (GW) of capacity at the end of 2010, but installed less than 10 megawatts (MW) in 2011 due to the being reduced by 25%, after installing almost 1,500 MW the year before. Installations increased to 109 MW in 2012. In 2014, no new installations were reported.
