

# **Denmark and energy storage projects merge**

## Overview

---

European Energy, in collaboration with Kragerup Estate, has initiated its first large-scale battery storage project in Denmark. The battery, expected to begin test operations in Q1 2025, will support the integration of renewable energy into the power grid. Does European energy have a battery storage project in Denmark?

European Energy breaks ground on battery storage in Denmark together with Kragerup Estate. Project to provide operational experience for European Energy in integration of battery solutions. Copenhagen, Denmark, 20th of January 2025 – European Energy has started on its first large-scale battery storage project.

What is European energy's new battery storage project?

This is done in collaboration with Kragerup Estate. This is the first battery storage project that European Energy has undertaken in Denmark, and it will provide valuable operational experience in integrating battery solutions with the grid for the company.

Where is European energy launching its first battery energy storage system?

Copenhagen, Denmark — European Energy has commenced the development of its first battery energy storage system (BESS) project at the Kragerup Estate in Denmark. The project, known as the Kragerup project, is being delivered in collaboration with Kragerup Estate.

How will a battery help balance the power grid in Denmark?

In addition, the battery will offer crucial system services to help balance the power grid in eastern Denmark. It will store surplus renewable energy during periods of high production and supply it back to the grid when demand is high, improving overall energy efficiency.

Why did Ineos invest in Denmark's Greensand CCS project?

INEOS and Harbour Energy make a final investment decision on Denmark's Greensand carbon storage facility. Denmark's Greensand CCS project, which enabled the first major cross-border transport and storage of CO<sub>2</sub> in Europe.

Why should European Energy Invest in battery storage?

With the installation of a state-of-the-art battery, European Energy is positioned to enhance the stability and resilience of the electricity grid. "Battery storage is a key component in the development of future energy projects.
