

# Energy Storage 32650 Lithium Battery

## Overview

---

What is a 32650 battery?

These batteries are designed for deep cycling and can withstand numerous charge and discharge cycles without significant degradation. High Energy Density: The 32650 battery offers a significant amount of energy in a compact form, making it ideal for applications where space is limited.

What is a 32650 LiFePO4 battery?

Part 1. What is 32650 LiFePO4 battery?

The 32650 LiFePO4 battery is a lithium iron phosphate battery that measures 32mm in diameter and 65mm in length, hence the name "32650." This type of battery is known for its superior safety, long cycle life, and stable performance compared to other lithium-ion batteries.

How long does a 32650 battery last?

With an 80% discharge rate, it can live up to 5000 life cycles without negatively affecting performance. 32650 battery size and weight are less than other cells. EPT is a leader in providing solutions for 32650 batteries. We are experts in researching, developing, manufacturing, and distributing rechargeable batteries.

What is the nominal voltage of a 32650 LiFePO4 cell?

The nominal voltage of a 32650 LiFePO4 cell is 3.2V. This stable voltage provides a reliable power output, which is crucial for applications that demand consistent performance. Additionally, the voltage remains relatively steady throughout the discharge cycle, contributing to the battery's reliability and efficiency.
