

# Energy storage battery sales in the Middle East

## Overview

---

The Middle East battery energy storage systems market size was estimated at USD 0.66 billion in 2024 and is projected to reach USD 2.60 billion, growing at a CAGR of 14.7% from 2025 to 2033. Why are batteries becoming a preferred energy storage solution in the Middle East?

In the Middle East and African region, the demand for batteries has increased in the Middle East as a preferred energy storage solution primarily due to technological innovation and the reduction of battery costs.

What is the largest battery energy storage project in the world?

SAN DIEGO, August 19, 2020 – LS Power today unveiled the largest battery energy storage project in the world – Gateway Energy Storage. The 250 megawatt (MW) Gateway project, located in the East Otay Mesa community in San Diego County, California, enhances grid reliability and reduces customer energy costs.

What is battery energy storage system?

Energy storage is the technique of storing energy in specific equipment or systems so that it can be used when needed later. This enables businesses and sectors to save energy and use it when demand rises, or grid failures occur. The Middle-East and Africa Battery Energy Storage System Market is segmented by Technology, Application, and Geography.

What is Eskom's first battery energy storage system?

December 2022: Eskom, South Africa's principal utility and grid operator, has begun work on its first battery energy storage system (BESS) with Hyosung Heavy Industries. It will generate 8MW of power and store 32MWh of energy, and it will be erected in 7-12 months with a connection to Eskom's Elandskop substation.
