

Estonia Tartu PV Energy Storage Project

Overview

How much money has Estonia provided for energy storage projects?

A state agency in Estonia has provided €5.2 million (US\$5.7 million) in grants for 10 energy storage projects, including a 4MW/8MWh battery storage project from utility Eesti Energia. The state-funded Environmental Investment Centre announced the grant funding for the ten projects being developed by six companies today (28 June).

How much PV capacity does Estonia have?

According to Andres Meesak, CEO of Estonia's PV association, Estonia now has around 107 MW of cumulative installed PV capacity. This represents a significant increase from the 17 MW of cumulative capacity at the end of 2017.

What are Estonia's networking opportunities?

Our networking opportunities have been described as second to none by industry professionals. Estonia has provided €5.2 million in grants for energy storage projects, including an 8MWh battery storage unit from Eesti Energia.
