

Explosion-proof box outdoor mobile power supply

Overview

What is an explosion-proof uninterruptible power supply system (UPS)?

Orga helps make daily operations easier, with Orga's Explosion-proof (EX) Uninterruptible Power Supply system (UPS). What does an Explosion-proof Uninterruptible Power Supply system do?

The batteries of our EX-certified UPS (Uninterruptible Power Supply) continue to supply power when the normal power supply is cut off.

Why do I need an ex-certified UPS (uninterruptible power supply)?

The batteries of our EX-certified UPS (Uninterruptible Power Supply) continue to supply power when the normal power supply is cut off. This ensures that critical systems keep running in order to keep the asset safe and compliant with relevant regulations in every situation, even in hazardous areas.

What is a CEAG explosion-protected power distribution?

CEAG explosion-protected power distributions fulfil these high mechanical explosion protection requirements by means of a high-strength protective framework made of stainless steel (1.4301) and enclosures that have been specially developed for this purpose.

How is the ex Ups built?

The EX UPS is built in accordance with the system sizing calculation and based on client requirements. Each system is built up in 1 x 100%, 2 x 100%, 2 x 50% or N+1 configuration and customised to the client's preferred setup. Each system is built up from one or more EX battery boxes and one or more EX battery chargers for even more reliability.
