

# Finland lithium battery pack price

## Overview

---

Does Finland have lithium ion batteries?

Finland is one of the few European countries where the ground contains all the key minerals needed to make lithium-ion batteries: cobalt, nickel, lithium and graphite.

How much does a lithium ion battery cost?

The electric vehicle market, the primary driver for lithium-ion batteries, grew more slowly than in previous years but still showed the lowest price at \$97 per kWh. Meanwhile, the stationary storage market has surged, with intense competition among cell and system suppliers, particularly in China.

How many tonnes of lithium are there in Finland?

The so-called Monte Carlo simulation estimate indicates that the undiscovered stocks contain, with a 50% probability, at least 510,000 tonnes of lithium. More than 90 per cent of the estimated undiscovered lithium resources in Finland are located either in the immediate vicinity of Kaustby or in the surrounding larger Järvi-Pohjanmaa area.

What makes Finland a good battery company?

Finland has expertise throughout the battery value chain, from the mining industry and processing of raw materials to technologies and services related to the manufacture and use of batteries, as well as charging technologies and recycling.

How much does a lithium battery cost in China?

Meanwhile, the stationary storage market has surged, with intense competition among cell and system suppliers, particularly in China. Regionally, the average prices of lithium battery packs were lower in China, at \$94 per kWh, while prices in the U.S. and Europe were 31% and 48% higher, respectively.

How much does a lithium battery cost in 2024?

In 2024, the average global prices of lithium-ion batteries dropped by 20%, reaching \$115 per kWh. For electric vehicle batteries, the price fell below \$100 per kWh Why Are Lithium Battery Prices Falling?
