

French 60v lithium battery pack customization

Overview

Can Lithium Werks make a custom battery pack?

Lithium Werks' patented Nanophosphate® battery technology (designed by MIT and A123) can be used in your custom modules. We can design and manufacture custom battery packs using lithium iron phosphate (LFP) cells for your power or energy application. Robust cylindrical, prismatic, or pouch cells can be produced for your pack.

Why should you choose a custom lithium-ion battery?

With stringent adherence to safety standards and compatibility with diverse drone systems, our custom lithium-ion batteries cater to the unique needs of aerial photography, surveillance, mapping and surveying, search and rescue, agricultural, and more.

What is a custom battery pack assembly service?

CMB's custom battery pack assembly services involve evaluating battery chemistries, casing design, and management systems based on customer needs. The process encompasses basic and advanced lithium battery pack design features, each tailored to meet specific requirements.

What are rechargeable lithium-ion batteries used for?

Rechargeable lithium-ion batteries find extensive use across a broad spectrum of applications. Some of the areas where our battery systems excel include: Our power packs are ideal for medical carts, handheld devices, surgical equipment, monitoring devices, and more. We have the ISO 13485 certificate for manufacturing batteries for medical devices.

Can Lithium Werks provide a battery management system (BMS)?

Lithium Werks can provide modules and packs with BMS (Battery Management Systems) to monitor, control and communicate with your devices or configure the modules to accept off-the-shelf BMS products. Lithium Werks builds

custom battery packs and modules using lithium iron phosphate LFP batteries.
