

French photovoltaic power station inverter

Overview

What is a photovoltaic inverter (PVI) station?

It is based on the same best-in-class power conversion platform as our AMPS solutions, enabling greater scalability and flexibility. Hitachi Energy's Photovoltaic Inverter (PVI) station provides you with advanced control and power capabilities that are designed to meet complex technical requirements and the most challenging grid codes.

Does France need a photovoltaic system?

France photovoltaic sector relies strongly on imports, particularly for commercial and industrial systems. Imports mainly come from other European countries, in particular Germany. This chapter aims to provide information on the benefits of PV for the economy.

How many companies are involved in inverter production?

Companies involved in Inverter production, a key component of solar systems. 12 Inverter manufacturers are listed below. List of Inverter manufacturers. A complete list of component companies involved in Inverter production.

Why should you choose a French inverter?

The inverter has acquired all its main and secondary characteristics in France. French manufacturing guarantees you the highest quality standards and procedures, combined with the technological expertise of professionals trained at the world's leading schools and universities.

Does France really need a fully integrated PV system?

France has, for the past 10 years, strongly encouraged fully building integrated PV, with preferential feed-in tariffs and access to Tenders, only being phased out over 2017/2018.

Where do photovoltaic systems come from?

Manufacturers of on-roof systems for industrial metallic roofs and bituminous or polymer roofs still remain since 2011, as Dome Solar, Solapro, Arcelor or Soprasolar. France photovoltaic sector relies strongly on imports, particularly for commercial and industrial systems. Imports mainly come from other European countries, in particular Germany.
