

Gambia container wind power base station

Overview

The Gambia relies entirely on imported fossil fuel for electricity generation – mainly HFO - for the main power plants in GBA, and Provincial towns as well as the Turkish emergency Karpowership. These faci.

Can wind energy be used for water pumping in the Gambia?

In the mechanical energy application, wind energy has been used for water pumping for many decades in The Gambia. This technology has provided water to populations for decades, especially in the absence of electricity services and thereby providing the much-needed vital essentials of life.

Is hydrogen a solution to the Gambia's energy deficit?

One month later, the government signed another MoU with H2 Gambia Limited, a subsidiary of the UK-based HydroGenesis Group, at African Energy Week 2023 in Cape Town to further explore the commercial prospects for hydrogen production. Renewable energy and green hydrogen present a dual solution to The Gambia's energy deficit.

How much solar power does the Gambia have?

According to the International Renewable Energy Agency (IRENA), The Gambia only had 2 MW of installed solar photovoltaic capacity at the close of 2022. Similarly, in the realm of wind energy, only small-scale projects initiated by private investors and non-governmental organizations are currently in operation.

Who owns the power plant in the Gambia?

These facilities are operated by National Water and Electricity Company (NAWEC) and Karadeniz Power ship Koray Bey Company Limited - an Independent Power Producer (IPP). In 2018, the effective electric installed capacity in The Gambia was around 135 MW.

Why is the Gambia embracing green energy initiatives?

The Gambia is embracing green energy initiatives in an effort to raise national

electrification rates and lower energy costs for its citizens.

Does the Gambia have a hydro potential?

Hydro potentials are non-existing in the Gambian territory. The average annual solar insolation for The Gambia is 4.5-5.3 kWh/m²-day, which represents a high generating potential for the country, making it interesting for PV Power Plants, Solar Home Systems (SHS), solar heater for the domestic and hotel industry and Hybrid Diesel-PV Systems.
