

Georgia Communication Base Station Power Supply Construction Project

Overview

How does Georgia Power work with the Georgia PSC?

Georgia Power continues to work with the Georgia PSC to procure and develop BESS projects across Georgia.

Does Georgia Power have a substation?

Georgia Power has maintained a substation on this site for decades, providing electricity to numerous residential, commercial, industrial, and public customers in the area. Rebuilding and expanding the existing electrical substation, high-voltage transmission lines, and low voltage distribution circuits. Burke, Jefferson, Warren and McDuffie.

What does Georgia Power do?

“At Georgia Power, we work with the Georgia PSC and many other stakeholders to make the investments required for a reliable and resilient power grid, integrating new technologies to better serve our customers today and as Georgia grows,” said Rick Anderson, senior vice president and senior production officer for Georgia Power.

Where is Georgia Power located?

Fulton, City of Atlanta. Georgia Power has maintained a substation on this site for decades, providing electricity to numerous residential, commercial, industrial, and public customers in the area. Rebuilding and expanding the existing electrical substation, high-voltage transmission lines, and low voltage distribution circuits.

Does Georgia Power support Customer-Sited solar?

Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs. The 2025 IRP includes two customer expansions of BESS programs including enhancements to the Customer Connected Solar Program and launching a new Customer-Sited

Solar Plus Storage Pilot.

Georgia Communication Base Station Power Supply Construction Pr

[Construction now underway on 765 MW of new battery](#)

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in ...
