

Georgia exports solar power to households

Overview

How does GA Solar help Georgia's energy consumers?

GA Solar helps advocate for solar power in Georgia on behalf of energy consumers. By informing local and state leaders about policies that make solar benefits accessible, GA Solar supports investment and local economic growth, keeping Georgia's economy strong.

Does Georgia Power pay for excess solar power?

Georgia Power does not pay customers the full retail rate for excess solar power sent back to the grid. Instead, they compensate customers at the avoided energy rate, which is equivalent to the amount that the utility would otherwise pay to buy the power on the open market.

Can I Sell my solar energy back to Georgia Power?

Customers connected to the grid with home solar systems in Georgia can sell their excess electricity back to Georgia Power for bill credits. Any excess solar energy generated in a month will carry over to the next month.

How does Georgia Power's Solar Program work?

Georgia Power's Solar Program helps maximize savings by encouraging the use of solar electricity at home. This reduces the amount of electricity sent back to the grid.

How many kW can a solar system sell to Georgia Power?

Georgia Power has a cap on the size of solar systems that can sell their electricity back to them. Residential systems are limited to 10 kW, and commercial systems are limited to 250 kW. Is Georgia Power's solar compensation the best in Georgia?

.

What are the benefits of solar power in Georgia?

One major benefit of using solar power in Georgia is the Solar Power Free-Market Financing Act of 2015, which allows solar leasing and power-purchase agreements, making solar more cost effective for home and business owners statewide.
